### Appeal to General Public

Discharging of solid Waste / Plastic waste or any waste other than sewage waste into Sewerage lines chokes the sewerage net work and shall cause restricted flow and create back flow conditions thus creating health hazard.

In view of experiencing such situation leading to back flow of sewage at commissioned localities viz Dogra Mohalla, Gurha Bakshi Nagar etc it is appealed to all, who are using under construction facilities of sewerage system in these areas to avoid disposing off solid wastes, plastic bottles or any waste other than sewage into the sewerage network to avoid blocking of sewerage lines and to avoid re-occurrence of back flow in the houses.

ERA looks forward for an active cooperation of public in this matter.
